

IN THE SPECIFICATION:

Please amend the specification as follows:

Paragraph beginning on page 5, at prenumbered line 15, has been amended as follows:

Please refer to Fig. 2. The present invention is related to a sealing cover for the upper beam of blinds, comprising a blind 20, a sealing cover 30, and a decoration piece 40. The blind 20 is made up of an upper beam 21 having a coupling hole 211 defining at both ends thereof respectively, and a blind embodiment 22 of a Venetian blind, a fabric drapery, a bamboo shade, a Roman blind, or a folding blind, etc. attached to the bottom of the upper beam 21 thereof. The sealing cover 30 is integrally molded, having a hollow coupling section 31 disposed at one side thereof matching the coupling hole 211 of the upper beam 21 for sleeve engagement therewith, a dovetail fixing block 32 protruding at the middle of the other side thereof, and a stop flange 33 extending transversely at the bottom of the dovetail fixing block 32 thereof. The decoration piece 40, integrally molded, is equipped with a decoration article 4 41 of various designs and styles attached at one side thereof, and a dovetail fixing groove 42 defining the other side thereof.
